## Experience

### Fullstack Web Development Trainee

Felix IT Systems Ahmedabad

July 2024 - (Present)

- Engaged in hands-on training to develop a strong foundation in fullstack web development, including frontend, backend, and database management.
- Learned and implemented technologies like HTML5, CSS3, JavaScript, and popular frameworks such as ReactJS and Node.js.
- Gained experience in creating RESTful APIs and working with databases like MongoDB and MySQL.
- Collaborated on real-world projects, emphasizing responsive design, code optimization, and cross-browser compatibility.
- Applied version control systems like Git and collaborated using platforms such as GitHub.
- Focused on improving problem-solving skills and following best practices in software development.
- Developed a keen understanding of Agile methodology, participating in stand-ups, sprints, and project lifecycle discussions.
